Numbers

Send a lottery game type and receive a set of random numbers for that game.

GET /numbers

Request

Note: The *game* parameter can only have one of three values: pick4, pick5, lotto

Parameter	Type	Example
game	String *required*	game=(pick4 | pick5 | lotto)

Response

Field	Description	Example
pick4	the set of four random numbers	"pick4": [3,21,5,15]
pick5	the set of five random numbers	"pick5": [17,5,22,40,46]
lotto	the set of six random numbers	"lotto": [17,3,19,20,4,43]

```
# Example Request

curl http://www.example.com/api/numbers?game=pick4

# Examples Response(s)

## pick4

{
  "pick4": [3,21,5,15]
}
## pick5

{
  "pick5": [17,5,22,40,46]
}
## lotto

{
  "lotto": [17,3,19,20,4,43]
}
## if invalid game value

<<game>> is not a valid game type. Value must be
pick4, pick5, or lotto.
```
