Needles

Send up to five different words (needles) and a single text block (haystack). See how many needles are in the haystack.

POST /needles

Request

Parameter	Type	Example
haystack	String *required*	"haystack":"Like finding a needle in a haystack"
needles	String[] *required*	"needles":["finding","needle","a", "haystack"]

Response

Field	Description	Example
needle	a word in the set	"needle": "finding"
total	match count	"total": 2

```
# Example Request

curl -X POST 'http://www.example.com/api/needles' \
-H "Content-Type:application/json" \
-d
'{
    "haystack":"Like finding a needle in a haystack",
    "needles":["finding","needle","a",
    "haystack"

]}'

# Example Response

{
"needles": [
    {
        "needle": "finding",
        "total": 1,
    },
    {
        "needle": "needle",
        "total": 1,
    },
    {
        "needle": "a",
        "total": 2,
    },
    ]
}

# if more than five needles in request

"The maximum number of needles is 5."
```
